THE ATC CUSTOM TRAILER EXPERIENCE

We pride ourselves on providing customized solutions to meet your needs. Our expertise in designing and developing trailers is just the beginning of what we can offer. Our solutions-oriented approach will analyze all of your needs and we'll work side-by-side with you, your company and your dealer to ensure that you get exactly what you require. To a fault, we rarely say "no." We'd love to work on making your dream a reality.

MADE IN THE USA

We believe that one, sole company should be responsible for their product. In today's world of outsourcing everything from material production, assembly, installation and even customer service, ATC builds virtually every aspect of the trailer in house. From selection and procurement of raw materials to frame assembly; from interior and exterior cladding to plumbing and electrical system installation; from door fabrication and installation to custom cabinetry and millwork; every component is produced and assembled under one roof in our Indiana facility.

ALUMINUM & STEEL

ATC is one of the only manufacturers who can build all models and custom trailers in either aluminum or steel. ATC will work with you to identify which construction method and materials are best suited for your needs.

The custom trailers pictured in this brochure are a small sample of the hundreds of custom trailers ATC makes every year.
